

## Our Alunite feature of the month:

### Alunite Centurion:

Van die dag wat Neil Myburg sy Alunite in Oktober 2014 oopgemaak het, het ons geweet dat hy diep spore gaan trap in die industrie en dat hy van geweldige waarde gaan wees vir ons groep.

Operating for only 1 year, Neil has grown into an exceptional Alunite. From day one he was determined to grow his business and, with having a positive attitude, he succeeded.

Just the way he treats his staff with the utmost respect, tells us a lot about what type of person he is.

His team is amazing and so is the set-up of his store. He purchased new machinery which, he claims, increased his manufacturing process by 100%. These machines, the Alumatic copy router and a pneumatic crimper, are what all of our Alunite's must aspire to grow into to increase production.

When I was in Neil's company, he reminded me of a statement that Walt Disney made some time ago: *"Around here we don't look backwards for very long. We keep moving forward, opening new doors and doing new things, because we're curious..... and curiosity keeps leading us down new paths."*
