

Need a New Product that may boost your sales?

5 October 2015

Solyx Window Films SA came to see us at the Franchise Office and showed us their product. Because our branches are widely spread, they see this as an opportunity to use us as their distributors and installers.

The only window film that I have encountered is the grey and bronze and reflective film (which they also do – their Heat & UV Protective range). I was impressed, however, with their Decorative / Architectural & Privacy ranges.

Alunite Vredenburg already has all the samples and pricelists. Jonathan will contact the Cape Town guys soon and, when he visits all the guys in the North next month, he will bring all the information along.

We are in the glass game, and this is a perfect add-on and the range of products are fantastic. There are businesses whose income are the application of window film. Imagine what it can do for your business as an add-on!
